

Model: HL-8/10

- Light and Manoeuvrable
- Compact
- Easy to operate
- Silent in operation
- Economical
- Minimum maintenance
- Versatile

Full Function Control Handle

Hand lowering is the key to productivity. The loads are conveniently deposited by three position (Lift, Neutral and Lower) control handle.

The ergonomically designed handle makes lifting loads and steering easier.

The neutral position eliminates backpressure from the pump thus allowing the operator to handle the load with ease.

The spring-loaded handle returns to vertical position when released.

A few strokes of the handle provide a full lift of 800 mm.

Salient Features

HL-8/10 is a special pallet truck which combines the advantages of hand pallet truck and the adjustable worktable. The forks of the pallet truck can be rapidly and easily lifted by means of the hydraulic pump which is operated with the drawbar. The quality and reliability of HL-8/10 is very high because.....

HL- 8/10 is equipped with adjustable stabilizers. At 350 mm they lift the steering wheels above the floor. This ensures that the equipment remains stationary when being used as a worktable.

And of course.....

PUMA offers tailormade versions for specific requirements such as galvanised version for cold store application.

SPECIFICATIONS		
Model	HL - 8	HL - 10
Load Capacity	800 kgs	1000 kgs
Lift Height	800 mm	800 mm
Minimum Height	90 mm	90 mm
Fork size	1150 x 560 mm	1150 x 560 mm
Lift/Stroke	14 mm	14 mm
Weight	122 kgs	150 kgs

- Wheels : 2 Nylon wheels \varnothing 180 x 50 mm
- 2 Nylon load wheels \varnothing 82 x 70 mm
